PROFESSIONAL SUMMARY

Results-driven Frontend Developer with strong full-stack capabilities, specializing in building high-performance, responsive web applications using React.js, JavaScript (ES6+), and Tailwind CSS. Proficient in dynamic state management, component-driven UI architectures, and translating design concepts into clean, accessible code. Demonstrated success building production-ready e-commerce platforms and financial dashboards, integrating complex RESTful APIs seamlessly with the frontend. Equipped with a solid foundation in software engineering principles from SQI College of ICT, enabling me to deliver immediate frontend value while collaborating effectively across full-stack remote environments.

TECHNICAL SKILLS

Frontend Dev: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Web Design, Component-Driven UI, State Management

Tools & Design: Figma (Design-to-Code), Git, GitHub, Postman API Testing, Chrome DevTools, NPM, Vercel, Netlify

Backend & Data: Node.js, Express.js, RESTful APIs, JWT Authentication, Firebase Auth, MongoDB, Mongoose ODM

PROFESSIONAL EXPERIENCE

FlyRank Artificial Intelligence Engineering Intern (Starting July 2026)

- Selected for an intensive engineering internship focusing on the integration of data-driven predictive models with modern user interfaces.
- Prepared to collaborate on building highly intuitive, responsive frontend dashboards to visualize machine learning pipelines and real-time data retrieval.

Independent Software Developer *June 2025 – Present Frontend & Full-Stack Developer / Freelance Projects*

- Architect and execute highly interactive user interfaces utilizing React.js and Tailwind CSS, improving application layout, accessibility, and rendering efficiency.
- Implement responsive, fluid layouts derived directly from Figma wireframes, ensuring cross-browser compatibility and seamless mobile responsiveness.
- Integrate frontend applications with complex backend REST APIs, utilizing state management to handle user authentication (JWT/Firebase), dynamic forms, and secure route guards.
- Deploy, monitor, and host client-facing client production web applications utilizing modern cloud platforms including Vercel and Netlify.
- Conduct rigorous frontend performance optimization and endpoint integration testing using Chrome DevTools and Postman to ensure snappy, zero-downtime user experiences.

FEATURED PROJECTS

Full-Stack E-Commerce Platform React.js, Tailwind CSS, Node.js, Express.js, MongoDB

- Built a full-stack e-commerce application with authentication, product management, shopping cart, and secure payment-ready architecture serving responsive experiences across desktop and mobile.
- Engineered responsive layouts using Tailwind CSS, optimizing asset delivery to achieve swift client-side page transitions and load times.

Personal Portfolio Platform & Integrations React.js, Tailwind CSS, GitHub API, Vercel.

- Developed a responsive, modern portfolio system utilizing React.js, integrating the external GitHub REST API to dynamically mirror live code metrics.

- Configured a reactive client-side contact portal with automated notification triggers to process asynchronous user inquiries instantly.

Spring Financial Bank (SFB) – FinTech Interface & Infrastructure React.js, Node.js, Express, MongoDB

- Developed a highly secure client-side dashboard interface supporting user registration, multi-tier authentication UI workflows, and transaction inputs.
- Embedded conditional rendering and client-side form validation mechanisms to streamline user onboarding workflows and prevent invalid data submission.

EDUCATION & QUALIFICATIONS

SQI College of ICT *Graduated Professional Diploma in Software Engineering*

Relevant Coursework: Full-Stack Web Development, Component-Driven Architectures, Responsive Design, Software Engineering Principles, RESTful API Integration
